ACKNOWLEDGEMENTS

CRIME IN WASHINGTON STATE 2013 was compiled from data submitted to the Washington Uniform Crime Reporting program of the Washington Association of Sheriffs and Police Chiefs by Washington State Law Enforcement agencies during 2013. Coverage is **99.9%** of the state population.

This report would not be possible without the voluntary cooperation of Washington State's law enforcement agencies and the commitment to submit timely, complete, and accurate crime statistics.

Introduction

This is the thirty-fourth (34th) annual publication of the Washington Uniform Crime Reporting (UCR) Program report of criminal offenses, arrests, law enforcement officers killed or assaulted, and full-time law enforcement employees. Funding for the Washington UCR Program is provided through contract with the Washington State Criminal Justice Training Commission (CJTC) and administration of the program is the responsibility of the Washington Association of Sheriffs and Police Chiefs (WASPC) Criminal Justice Information Support (CJIS) Department. The Washington UCR Program is unique in that it is sponsored, administered, and supported by an organization of contributing agency administrators rather than a bureau or department of state government.

How To Use This Report

The ***Crime In Washington 2013*** is our second crime statistics publication with the majority of data submitted from Washington law enforcement agencies using the National Incident-Based Reporting System (NIBRS). There are important factors the reader must consider when reading or using this report as well as crime statistic reports available from the FBI or other sources:

1. The data used to compile this report are based on a “snapshot” of our repository database as of **February 28, 2014**. In NIBRS, there are no “fixed” statistics because law enforcement agencies update their incidents as new information becomes available.
2. The data used in this report are based on the NIBRS method of submitting crime statistics. It is more comprehensive and detailed than the Summary Reporting System in the past so the statistics in NIBRS and Summary Reporting should not be compared. For the most part, the data submitted via NIBRS have been separated in this publication from the data reported via Summary Reporting.
3. The data displayed in this report should not be compared to the FBI ***Crime In The United States 2013*** report which will be published later this year. Even though Washington State forwards the crime data submitted via NIBRS to the FBI, the FBI converts the data to the Summary Reporting System and the offenses are counted differently.
4. The data displayed per agency in this report should not be used to compare to other agencies or compile “rankings” of cities and counties. There are several variables which contribute to crime in a particular jurisdiction, including the demographics/economic/cultural make-up of the population, the local industrial/economic base, its dependence upon neighboring jurisdictions, the transportation system, its economic dependence on non-residents (such as tourists, shoppers, or other day-time visitors), and its proximity to military installations, correctional facilities, universities/colleges, or state hospitals.

Background

Although the collection of nationwide crime information dates back to the 1890s, no ongoing program was initiated until the International Association of Chiefs of Police (IACP) established a committee on uniform crime records in 1917. The committee's responsibility to provide management information to law enforcement agencies was eventually turned over to the Federal Bureau of Investigation (FBI) in 1930 when

the FBI received a congressional mandate to collect and disseminate national crime information. The IACP has continued to serve the UCR Program in an advisory capacity and has been joined in this responsibility by the National Sheriffs Association.

The FBI Summary UCR Program remained virtually unchanged, other than adding the Arson offense in 1979, until development of the National Incident-Based Reporting System (NIBRS). NIBRS was a result of a 1970s law enforcement study to improve crime statistics with the guidelines and specifications developed and based on recommendations and collaboration during the 1980s. A pilot was conducted during 1987 in South Carolina and at a national UCR conference in early 1988, the consensus of attendees was that the FBI should continue its efforts to implement NIBRS nationally.

The Washington UCR Program was activated in October 1979 and began the collection of monthly Summary Reporting from contributing agencies in January 1980. In December 2006, Washington State was certified by the FBI to officially collect and submit NIBRS data. In January 2008, based on a 2007 advisory committee recommendation, the WASPC Executive Board made the decision and set the goal date for Washington State law enforcement agencies to convert from Summary Reporting to NIBRS by January 1, 2012. Due to a number of agencies involved in records management system (RMS) upgrades and replacements during 2011, the Executive Board agreed to grant extensions to agencies that could not meet January 2012 deadline.

Today, the Washington State UCR Program offers on-line data entry or upload and provides various reports necessary for statistical purposes in the criminal justice system. Data for ***Crime in Washington 2013*** were compiled from monthly NIBRS and Summary Reporting submissions by individual law enforcement agencies throughout the State of Washington. The majority of Washington State agencies submit via the NIBRS method and our goal is 100% NIBRS participation in the near future.

As mentioned, the data included in this report are comprised of both NIBRS and Summary Reporting data but because not all agencies in Washington have converted to the NIBRS method of submission, the individual agency NIBRS and Summary Reporting data are displayed separately. The "Individual Agency NIBRS" pages display a comparison between 2012 and 2013 for only the agencies that submitted NIBRS for both years. Due to the disparate reporting methods, data cannot be compared between NIBRS and Summary Reporting submitting agencies.

Crime Index

In the past, the Crime Index was used as a basic measure for comparing the extent of crime among cities, counties, and states of similar size. The index was simply the total number of certain offenses that occurred in a given area in a given calendar period. The offenses used in the Crime Index were the Summary UCR offenses of Murder, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny-Theft, Motor Vehicle Theft, and Arson.

In June 2004, the FBI Criminal Justice Information Services Division Advisory Policy Board approved discontinuing the use of the Crime Index in the FBI UCR Program and its publications. Because Washington State is no longer converting NIBRS data into Summary Reporting data for the purposes of statewide statistical comparison, we discontinued using the “term” Crime Index as a measure to depict incidence of crime beginning with the 2012 annual report.

Crime Rate

A crime rate is based on a specific crime category, such as Crimes Against Persons, Crimes Against Property, or Crimes Against Society, or specific crime grouping, such as violent crimes. The category or grouping is adjusted for variances in population by indicating the number of offenses for each 1,000 persons (other base population increments may be used such as the number of offenses per 100,000). This means that comparisons may be made among several areas with different populations or within one area with different populations over a period of time, without the information being biased by population differences. For most general comparisons, the crime rate is probably the most accurate to use.

To calculate the crime rate, first divide the population of the area by 1,000, and divide the crime category or grouping by that answer. For example, if a city has a population of 273,000 and a crime category of 21,257 the calculations would be:

1. 273,000 divided by 1,000 = 273.0
2. 21,257 divided by 273.0 = 77.86

Thus, although a city's crime category is 21,257, its crime rate (the number of crimes for each 1,000 people) is 77.86.

Classification of Offenses

All offenses are classified on the basis of law enforcement investigation in accordance with national UCR offense definitions and are not necessarily identical to the Revised Code of Washington (RCW) definitions. Because UCR identifies and tallies *law enforcement* contact, offense classifications are not based on filings of the prosecutor, court, medical examiner, jury, or other judicial or subsequent findings.

National Incident-Based Reporting System (NIBRS)

NIBRS divides offenses into two (2) categories of offenses designated as Group A - Incident and Group B - Arrest. The Group A offenses collected in the NIBRS program are: Arson; Assault; Bribery; Burglary; Counterfeiting/Forgery; Destruction/Damage/Vandalism of Property; Drug/Narcotic Offenses; Embezzlement; Extortion/Blackmail; Fraud; Gambling Offenses; Homicide Offenses; Human Trafficking Offenses; Kidnapping/Abduction; Larceny/Theft Offenses; Motor Vehicle Theft; Pornography/Obscene Material Offenses; Prostitution Offenses; Robbery; Forcible Sex Offenses; Non-Forcible Sex Offenses; Stolen Property Offenses; Violation of No Contact/Protection Orders, and; Weapon Law Violations. Group A offenses include statistical data on the incident, all offenses committed, property involved, weapons involved, victim and offender demographics, arrest information, and clearance status.

Group B offenses, for which only arrest data are collected, include: Bad Checks; Curfew/Vagrancy Violations; Disorderly Conduct; Driving Under the Influence; Non-Violent Family Offenses; Liquor Law Violations; Peeping Tom; Trespass of Real Property; and All Other Non-Traffic Offenses.

Summary Reporting System

Summary Reporting divides offenses into two (2) major classifications designated as Part I and Part II offenses and different information is collected for each classification. Part I offenses include (1) violent crimes: Murder and Non-Negligent Manslaughter, Forcible Rape, Robbery, and Aggravated Assault; and (2) property crimes: Burglary, Larceny-Theft, Motor Vehicle Theft, and, since January 1979, Arson. In the past, Part I offenses were used to calculate the Crime Index and Crime Rate. All other offenses are classified under Part II offenses.

Counting Offenses

National Incident-Based Reporting System (NIBRS)

All crimes committed within the same incident by the same person or group of persons, without a significant time or space interval separating them, are reported in NIBRS - a hierarchy rule does not exist as it does in Summary Reporting. For example, if a rape case involves crimes of motor vehicle theft and kidnapping, all crimes are reported. However, if a crime is an inherent part of another crime, only one crime may be appropriately reported. For example, larceny is inherent in the crime of burglary and would not be reported as a separate crime in the incident; however, if the suspect, upon leaving the residence, takes items outside the structure, larceny would be reported as a second crime. As another example, assault is an element in robbery and would not be reported as a crime separately from the robbery; however, if the suspect forces the victim to engage in a sexual act, both a robbery and forcible sex offense would be reported because a forced sexual act is not an element of robbery.

Summary Reporting System

The number of offenses is counted only for Part I crimes and Simple Assault. The method of counting varies with the type of crime committed - the number of offenders does not determine the number of offenses. For Murder, Non-Negligent Manslaughter, Forcible Rape and Aggravated Assault, one offense is counted for *each victim*, regardless of the number of offenders involved. For Robbery and Larceny, one offense is counted for *each distinct operation* that is separate in time and place. The number of victims in any one operation does not determine the number of offenses. For example, if twenty (20) people are robbed in a bar at the same time, only one (1) offense has occurred. However, if that robber leaves the bar and holds up a passerby, a second offense has occurred. For Burglary, one offense is counted for each structure that is illegally entered. However, when the structure is an apartment house, business, or office building in which units are leased for a period of time, one offense is counted for each unit burglarized. For Motor Vehicle Theft, one offense is counted for each vehicle stolen.

NOTE: Attempts to commit any of the Part I offenses are counted as actual offenses, except Attempt to

Murder or Assault to Kill are counted as Aggravated Assault.

In Summary Reporting, for multiple offenses that occur in one crime incident, only the most serious offense is counted. This is known as the **hierarchy rule**. Part I crimes are ranked according to seriousness and appear in order from most serious to least serious crimes. For example: a robber takes a man's wallet and then beats him causing serious injury. Both a robbery and an aggravated assault have occurred, but because robbery is considered by FBI UCR definition to be more serious, only the robbery is counted.

NOTE: 1. Arson is an exception to the above rule and is counted separately from other offenses.
2. The number of offenses is not reported for Part II offenses.

Arrests

National Incident-Based Reporting System (NIBRS)

In NIBRS, the law enforcement agencies collect detailed data elements related to incidents and arrests. The Group A - Incident Reports are comprised of segments (Administrative, Offense, Property, Victim, Offender, and Arrestee) and within the segments are multiple data elements identifying the incident, such as originating agency identifier (ORI), incident number, date, location, offense, demographics, and other relevant segment categories. Therefore, unlike Summary Reporting, NIBRS arrests and clearances can be submitted as updates to the Group A - Incidents reported.

Summary Reporting System

Arrest information is collected for all Summary Part I and Part II offenses according to the age, sex, and race of the offender. It is not possible, however, to correlate race with sex or specific ages because the information is collected independently, thus limiting analysis. Further, arrest figures cannot be directly related to the number of crimes cleared because the arrest-totals count all offenders arrested for each offense, and clearance-totals count only the offense for which an arrest or arrests have occurred.

Clearances

National Incident-Based Reporting System (NIBRS)

In NIBRS, clearances are on the incident-level rather than the offense-level. If one offense within an incident is cleared, all offenses in that incident are cleared. Likewise, the arrest of one offender in an incident will clear it even if other offenders have not been arrested yet. Clearances by arrest are automatically created when an Arrest Segment is submitted with a Group A - Incident. An incident cannot be cleared exceptionally if there has been an arrest.

Clearances by Exceptional Means allow an agency to clear an incident without an arrest. The criteria include: 1) the identity of at least one offender must be known; 2) sufficient probable cause must have been developed to support the arrest and prosecution of the offender; 3) the offender's exact location must be known, and; 4) there must be a reason, outside of law enforcement's control, which prevents the arrest. For

example, the death of the offender or the offender is in the custody of another jurisdiction.

Summary Reporting System

An offense is considered cleared when at least one offender is arrested for a crime, even though several offenders may have been involved. Offenses may also be cleared by exceptional means when the offender commits suicide, makes a dying declaration, confesses while in custody or serving time for another crime, is prosecuted in another jurisdiction for the same offense, is a juvenile who is handled by notifying the parents, or when the victim refuses to prosecute or another jurisdiction refuses to extradite the offender, etc.

Clearances are counted as "adult" and "juvenile". A "juvenile" clearance is counted only when juveniles are exclusively involved in the clearance of an offense. If the arrest of both adults and juveniles result in a clearance, it is counted as an "adult" clearance.

NOTE: Not all crimes are cleared within the calendar year in which the offense occurs.

Objectives of the Washington State UCR Program

The primary objective of the ***Crime in Washington 2013*** is to implement and administer a uniform system of collecting crime and arrest statistical data from contributing law enforcement agencies in the State of Washington and present the information in complete, accurate, and timely method for the contributors and users of the data. Whether it's a citizen interested in the probability of crime in a neighborhood, a forecaster tracking trends for budget recommendations, or a criminal justice practitioner scheduling personnel deployment in the interest of public safety, data-driven evidence is the foundation for each decision-maker.

Individuals using the tabulations in the ***Crime in Washington 2013*** are cautioned against drawing conclusions by making direct comparisons between cities and/or counties due to the existence of numerous factors which affect the amount and type of crime from place to place. It's important to remember crime is a social problem and, therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control.

When compiled and evaluated, the data available in the ***Crime in Washington 2013*** can be utilized:

1. To identify the number of crimes reported by contributing agencies.
2. To identify the geographical distribution of reported offenses.
3. To determine whether or not reported crimes have increased or decreased.
4. To determine whether or not reported crimes have increased or decreased by population groups.
5. To determine the number of clearances and the clearance rate for reported offenses.
6. To determine the reported number of arrests by offense, age, sex, and race.
7. To determine the number of law enforcement officers assaulted and killed.
8. To determine the number of commissioned (sworn) and civilian law enforcement employees by gender.
9. To determine the rate per population group of commissioned (sworn) and civilian law enforcement employees.

Although, generally, crime reporting is voluntary, there are a few Washington State statutes requiring submission to the WASPC CJIS Department, such as institutions of higher learning pursuant to RCW 28B.10.569, domestic violence crime reporting pursuant to RCW 10.99.030, and malicious harassment crime reporting pursuant to RCW 36.28A.030. In addition, there are state funding opportunities and programs tied to crime statistic reporting. For example, RCW 82.14.310 for counties and RCW 82.14.320 for municipalities define the criminal justice assistance accounts and the use of crime statistics for calculation in funding.

Timely UCR submission to the WASPC CJIS Department is a requirement for the agency accreditation program in Washington State - Chapter 5, Standard 5.12. Some grant opportunities from federal agencies depend on crime statistics as well. For example, the federal legislation authorizing the Edward Byrne Memorial Justice Assistance Grant (JAG) Program awards is 42 United States Code (U.S.C.) § 3751(a). To be eligible, the JAG statute requires local governments report UCR data on violent crimes for at least three (3) of the last ten (10) years. (Reference: www.bja.gov/Funding/JAGFAQ.pdf)

Domestic Violence

Domestic violence offense crime statistics are collected as mandated by the Washington State statute (RCW 10.99.030). These are not separate offenses from those collected in the State UCR Program but because of the nature of the relationship of those involved, these offenses are further categorized for analysis. For agencies submitting NIBRS data, the domestic violence data element is collected on the following offenses: Aggravated Assault, Arson, Burglary, Forcible Fondling, Forcible Rape, Forcible Sodomy, Incest, Intimidation, Kidnapping/Abduction, Larceny/Theft, Motor Vehicle Theft, Murder/Non-Negligent Manslaughter, Negligent Manslaughter, Robbery, Sexual Assault with an Object, Simple Assault, Statutory Rape, and Violation of No Contact/Protection Order. For agencies submitting via Summary Reporting, the domestic violence offenses collected are limited to: Homicide, Forcible Rape, Robbery, Assault, Burglary, Larceny, Motor Vehicle Theft, Arson, and Violation of Protection/No-Contact Orders.

Hate Crime (Malicious Harassment)

Washington State statute (RCW 36.28A.030) mandates the collection of information related to violations of Malicious Harassment or other crimes of bigotry or bias apparently directed against victims perceived to be of a particular race, religion, ancestry, ethnicity, national origin, gender, sexual orientation, or mental, physical, or sensory disability. Like domestic violence offenses, "hate crimes" are not distinct, separate offenses but are traditional offenses motivated in whole, or in part, by the offender's bias.

The data element must be used to indicate whether or not any Group A - Incident offense was motivated by bias and, if so, what kind. For Summary Reporting submission, the "hate crime" qualifier is included on offenses limited to Murder, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny-Theft, Motor Vehicle Theft, Arson, Simple Assault, Intimidation, and Destruction/Damage/Vandalism. Data collected in the Hate Crime Program are forwarded to the FBI.

Data in this section represent the number of persons arrested, not the number of charges filed. The following tables depict counts for non-traffic offenses in which an individual was taken into custody, cited, or summoned to appear in court. In some instances, an arrest may be counted when a juvenile is taken into custody but released without being charged. These numbers are derived from monthly National Incident-Based Reporting System (NIBRS) submissions by Washington State law enforcement agencies.

Statewide Arrests

Total Arrests

Reported Arrests **160,938**
 Rate per 1,000 **23.4**

The term "arrest" is defined as a physical arrest, citation, or served summons. This data represents the number of persons arrested, not on charges filed; therefore, each reporting jurisdiction submits one set of arrest data for each person per single apprehension. One set of arrest data will clear a single or multiple offenses in the same incident and/or multiple incidents.

Arrests on warrants issued by another jurisdiction are reported by the originating agency, not the arresting agency.

All persons arrested for the commission of a Group "A" or Group "B" crime are included in this count. A Group "B" crime, which is only reported on the arrest level, encompasses offenses which are not under the Group "A" category. Excluded from this count are any traffic-related arrests, with the exception of DUI, Hit and Run (of a person), and Vehicular Manslaughter.

17.0% of arrests were DUI.

26.1% of total arrestees were between 18 and 24 years of age.

Total Number of Arrests by Age in 2013

97.5% of all arrestees were unarmed.

When apprehended, **36.5%** of the weapons in arrestees' possession were firearms; **8.8%** of those firearms were automatic.

Reported Juvenile Arrests **13,806**

Under UCR guidelines, a juvenile is counted as “arrested” when the circumstances are such that if the juvenile were an adult, an arrest would have been reported. Any situation involving a juvenile, in lieu of an actual arrest, such as summoned, cited, or notified to appear before a juvenile court or similar authority for a violation of the law, is reported as an arrest.

Juvenile Arrests by Category

43.0% of juvenile arrestees were between 13 and 15 years of age.

Hate Crime

Collection of Hate Crime (Malicious Harassment) is mandated by State of Washington statute, RCW 36.28A.030. Hate crimes are not separate, distinct offenses, but rather traditional crimes motivated by the offender's bias. The data are derived from quarterly Summary Reporting or monthly National Incident-Based Reporting System (NIBRS) submissions by Washington State law enforcement agencies.

2013 Washington Hate Crime

Definition: A criminal offense committed against a person or property which is motivated in whole or in part, by the offender's bias against a race/national origin, religion, sexual-orientation, mental/physical/sensory disability, gender or ethnicity.

Hate Crime

Bias Motivated Incidents Reported **292**
Bias Motivated Offenses Reported **351**
Number of Known Offenders **171**

Hate crime incidents are identified on the subjective motivation of the offender(s). Law enforcement investigations solely determine the sufficient objective facts to lead to a reasonable and prudent conclusion that the offender's actions were motivated by bias against a racial, religious, ethnical/national origin, mental/physical/sensory disability, gender or sexual-orientation group.

Accurate data collection for hate crime depends on proper training of law enforcement to recognize such incidents and the cooperation and desire of law enforcement communities to report these offenses without the influence of special interest groups, media, or politics.

Information derived from the following indicators can establish supportive facts to correctly identify hate bias motivation:

- Bias-related drawings, markings, symbols or graffiti were left at the crime scene.
- Bias-related oral comments, written statements or gestures made by the offender which indicate his/her bias.
- The incident coincided with a holiday relating to or a date of particular significance to, a race, religion, disability, ethnicity, gender or sexual-orientation.
- The offender and the victim were of different race, religion, ethnicity or sexual-orientation.
- Certain objects, items or things which indicate bias were used in the commission of the crime.
- The victim is a member and/or engaged in activities promoting a racial, religious, disability, ethnic or sexual-orientation group.
- Several incidents occurred in the same locality, at or about the same time, and the victims were all the same race, religion, disability, ethnicity or sexual-orientation.

Individual Agency National Incident-Based Reporting System (NIBRS)

The following section provides individual law enforcement agencies' offense counts for Crimes Against Persons, Crimes Against Property, and Crimes Against Society.

Populations are based on the Washington State Office of Financial Management "Official November 30, 2013, Population Estimates", except for university, port, tribal, or state law enforcement agencies and non-reporting agencies which show zero populations.

The population data reflect permanent residents only. It does not include transient and visitor populations or residents of the military bases and state or federal hospitals.

Individuals using these tabulations are cautioned against drawing conclusions by making direct comparisons between cities and/or counties due to the existence of numerous factors which affect the amount and type of crime from place to place. It is important to remember that crime is a social problem and, therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control.
