Data Element Definitions and Values

Data elements are the data fields used in NIBRS to describe the victims, offenders, arrestees, and circumstances of criminal incidents and arrests. There are 62 data elements. Some are required to be reported. Others may be reported at the option of the agency submitting the report.

The data elements and data values listed are used for reporting incidents and arrests involving Group “A” offenses and for reporting arrests involving Group “B” offenses.

Whether or not a data element is used in only the Group “A” Incident Report or both the Group “A” Incident Report and the Group “B” Arrest Report is indicated by the following parenthetical indicators in each data element description:

Used In	Indicator
Group “A” Incident Report (only)	(A)
Group “A” and “B” Reports (both)	(A & B)

WASPC data collection guidelines follow those found in the FBI NIBRS *Technical Specification, Version 3.0*, <https://ucr.fbi.gov/technical-specifications>; the only exceptions are:

- Data Element 6: Additional Group A Offense Code 500, Violation of No Contact/Protection Order
- Data Element 8A - Bias Motivation: Additional Data Value 53 = Anti-Sensory Disability
- Data Element 12: Gang Involvement indicator is Mandatory
- Data Element 53: Domestic Violence Indicator
- Data Element 54: Incident Address (for Crime Mapping)
- Data Element 55: Incident Address City (for Crime Mapping)
- Data Element 56: Incident Address State = WA (for Crime Mapping)
- Data Element 57: Incident Address Zip Code (for Crime Mapping)
- Data Element 58: Incident Latitude (for Crime Mapping)
- Data Element 59: Incident Longitude (for Crime Mapping)

A description of each data element appears on the following pages.

1 - ORI Number, 9 characters (A & B): This is the unique nine-character NCIC Originating Agency Identifier (ORI) Number that has been assigned to each agency. It must be included in each Group “A” Incident Report Segment or Group “B” Arrest Report.

2 - Incident Number, 12 characters (A): This is the number assigned by the reporting agency to each Group “A” Incident Report to uniquely identify an incident, e.g., the Originating Agency Case (OCA) Number. The number can be up to 12 characters in length. The Incident Number must be included in each segment of the Group “A” Incident Report.

2A - Cargo Theft, 1 character (A): This data element is to be used to indicate whether or not the incident involved a cargo theft. This data element can only be entered when the incident has at least one of the following offenses:

All Other Larceny	23H
Bribery	510
Burglary/Breaking & Entering	220
Credit Card/Automatic Teller Machine Fraud	26B
Embezzlement	270
Extortion/Blackmail	210
False Pretenses/Swindle/Confidence Game	26A
Hacking/Computer Invasion	26G
Identity Theft	26F
Impersonation	26C
Motor Vehicle Theft	240
Robbery	120
Theft From Building	23D
Theft From Motor Vehicle	23F
Wire Fraud	26E

Allowed entries (Enter only one):

N = No

Y = Yes

NOTE: If multiple offenses occurred within an incident and one was associated with a cargo theft, then Y = Yes must be entered.

The definition of Cargo Theft is the criminal taking of any cargo including, but not limited to, goods, assets, money, or baggage that constitutes, in whole or in part, a commercial shipment of freight moving in commerce, from any pipeline system, railroad car, motor truck, or other vehicle, or from any tank or storage facility, station house, platform, or depot, or from any vessel or wharf, or from any aircraft, air terminal, airport, aircraft terminal or air navigation facility, or from any intermodal container, intermodal chassis, trailer, container freight station, warehouse, freight distribution facility, or freight consolidation facility. For purposes of this definition, cargo shall be deemed as moving in commerce at all points between the point of origin and the final destination, regardless of any temporary stop while awaiting transshipment or otherwise.

3 - Incident Date/Hour, 11 characters (A): This data element must be included in each Group “A” Incident Report. It must be used to enter the month, day, year, and hour (MM/DD/YYYY/HH) when the incident occurred or started or the beginning of the time period in which it occurred (as appropriate). Military 24-hour time must be used. If the Incident Date is unknown, the date of the report with the indicator R = Report should be entered. If the Incident Hour is unknown, the hour should be left blank or the hour can be estimated; however, when

Data Element 25 (Type of Victim) = L (Law Enforcement Officer) then Data Element 3 (Incident Date/Hour) *must be populated with a valid hour (00-23)*.

If the incident occurred on or between midnight and 0059, 00 should be entered; if on or between 0100 and 0159, 01 should be entered; if on or between 2300 and 2359, 23 should be entered; etc. If the incident occurred at exactly midnight, it is to be considered to have occurred at the beginning of the next day, as if the crime occurred at 1 minute past midnight. Therefore, 00 must be entered for the hour, along with the next day's date.

4 - Cleared Exceptionally, 1 character (A): This data element must be included in each Group "A" Incident Report. It is used to indicate whether or not the incident was cleared exceptionally. If not, N = Not Applicable must be entered. In a multiple-offense incident, the exceptional clearance of one offense clears the entire incident. An incident cannot be cleared exceptionally if it was previously or at the same time cleared by an arrest, i.e., if an Arrestee Segment was or is being submitted.

To clear an offense by exceptional means, all of the following four (4) conditions must be met:

1. The investigation must have clearly and definitely established the identity of at least one offender.
2. Sufficient probable cause must have been developed to support arresting, charging, and prosecuting the offender.
3. The exact location of the offender must be known so that an arrest could be made.
4. There must be a reason outside the control of law enforcement which prevents the arrest, i.e., A through E, below:

Allowed entries (Enter only one):

- A = Death of Offender
- B = Prosecution Declined (by the prosecutor for other than lack of probable cause)
- C = In Custody of Other Jurisdiction
- D = Victim Refused to Cooperate (in the prosecution)
- E = Juvenile/No Custody (the handling of a juvenile without taking him/her into custody, but rather by oral or written notice given to the parents or legal guardian in a case involving a minor offense, such as petty larceny)
- N = Not Applicable (not cleared exceptionally)

NOTE: The clearance of an incident should not be confused with closing an investigation.

5 - Exceptional Clearance Date, 8 characters (A): If an incident was cleared by exceptional means i.e., a code other than N was entered into Data Element 4, the month, day, and year (MM/DD/YYYY) when the incident was cleared must be entered into this data element.

6 - UCR Offense Code, 3 characters (A & B): This data element must be used to enter the UCR Offense Codes of the up to ten (10) most serious (as determined by the reporting agency) Group "A" offenses involved in the incident. There are fifty-three (53) possible Group "A" Offense Code entries. A separate Offense Segment, containing Data Elements 6 through 13, must be submitted for each reported Group "A" Offense Code involved in the incident. Only one (1)

Offense Segment can be submitted for each reported UCR Offense Code even though there may have been more than one victim of the crime. At least one (1) Offense Segment must be included in a Group “A” Incident Report.

7 - Offense Attempted/Completed, 1 character (A): This data element must be used to indicate whether each offense in the incident was completed or merely attempted. If there was more than one occurrence of the same UCR Offense within an incident and one was completed, then C = Completed must be entered.

Attempted Murder must be reported as Aggravated Assault; all Assault Offenses and Violation of No Contact/Protection Order must be coded as C = Completed.

Allowed Entries (Enter only one):

A = Attempted

C = Completed

8 - Offender(s) Suspected of Using, 1 character (A): This data element must be used to indicate whether any of the offenders in the incident were suspected of consuming alcohol or using drugs/narcotics during or shortly before the incident; or of using a computer, computer terminal, or other computer equipment to perpetrate the crime. Up to three entries can be made.

If the reporting officer did not indicate that any of the offender(s) were suspected of using alcohol, computer equipment, or drugs/narcotics, then N = Not Applicable must be entered.

Allowed entries (Enter up to three):

A = Alcohol

C = Computer Equipment (Handheld Devices)

D = Drugs/Narcotics

N = Not Applicable

8A - Bias Motivation, 2 characters (A): This data element must be used to indicate whether or not the offense was motivated by bias and, if so, what kind. Because of the difficulty of ascertaining the offender's subjective motivation, bias must be reported only if investigation reveals sufficient objective facts to lead a reasonable and prudent person to conclude that the offender's actions were motivated, in whole or in part, by bias against race, religion, disability, ethnicity, or sexual orientation. Up to five Bias Motivations can be reported, however, the first Bias Motivation is mandatory.

* Washington-specific bias motivation

NOTE: Anti-gender data values were reversed prior to 2017.

9 - Location Type, 2 characters (A): This data element is to be used to report the type of location/premises where each offense took place. Only one location can be entered for each offense.

In such cases, the number of structures (premises) entered must be reported.

The Hotel Rule applies to temporary lodgings or rental storage facilities, e.g. mini-storage or self-storage buildings; according to the FBI guidelines, if a number of units under a single manager are burglarized and the offenses are most likely to be reported by the manager rather than the individual tenants, the burglary should be scored as one offense. The total number (up to 99) of individual rooms, units, suites, storage compartments, etc. entered must be reported in this data element.

11 - Method of Entry, 1 character (A) (Mandatory only if the offense is Burglary): This data element must be used only if the offense is 220-Burglary/B&E. An unforced entry is one when the unlawful entry was achieved without force through an unlocked door or window. If both forced and unforced entries were involved in the crime, the entry must be reported as F = Force since the entry was accomplished through Force.

Therefore, when the offense is 35A Drug/Narcotic Violations, 6 = Seized was entered into Data Element 14 (Type Property Loss/Etc.) and 10 = Drugs/Narcotics was entered into Data Element 15 (Property Description), no value can be entered into this data element; Data Elements 20 (Suspected Drug Type), 21 (Estimated Drug Quantity), and 22 (Type Drug Measurement) must be used instead.

However, when drugs or narcotics are involved in other types of crime (e.g., they were stolen through burglary, robbery, theft, etc., or destroyed by arson), their value must be entered into this data element, and Data Elements 20, 21, and 22 must be left blank.

Recovered is entered into Data Element 14 (Type Property Loss/Etc.). If the recovery date is unknown, enter the date of the report.

Up to ten (10) dates of recovery can be entered to match each of the up to ten (10) property descriptions that are associated with each Property Segment (i.e., each type of property loss/etc.) in the incident. NOTE: Again, recovered property must be reported by the jurisdiction in which it was stolen.

19 - Number of Recovered Motor Vehicles, 2 characters (A) (Mandatory only if offense is Motor Vehicle Theft): This data element indicates how many motor vehicles were recovered in a Motor Vehicle Theft incident. Therefore, it should be used only if the offense is 240-Motor Vehicle Theft, Data Element 14 (Type of Property Loss/Etc.) was entered as 5 = Recovered, and Data Element 15 (Property Description) was entered as 03 = Automobiles, 05 = Buses, 24 = Other Motor Vehicles, 28 = Recreational Vehicles, or 37 = Trucks.

Also, it should be entered if one of the offenses is 35A-Drug/Narcotic Violations and Data Element 14 (Type Property Loss/Etc.) is entered as 1 = None.

This data element should not be used when drugs or narcotics were burned, stolen, etc., in connection with other offenses, such as Arson, Burglary/B&E, Larceny/Theft, etc.

Up to three (3) types of drugs/narcotics can be entered. If more than three are involved, the two most important (as determined by the reporting agency taking into account the quantity, value, and deadliness of the drugs/narcotics) should be reported under their applicable drug types and the remaining drugs/narcotics should be entered as a single X = Over 3 Drug Types entry.

where many participants are arrested. When reporting these data, the agency should keep in mind that the relationship requested is that of the victim to the offender. Also, the relationship of the victim to each offender must be reported.

36 - Offender (Sequence) Number, 2 characters (A) (Mandatory): Each offender in the incident must be assigned a sequence number from 01 to 99. A separate set of offender data must be submitted for each numbered offender.

If nothing is known about the offender(s), 00 should be reported.

For the offense of 500-Violation of No Contact/Protection Order, the offender must be known.

NOTE: If sequence numbers have already been assigned because the offenders perpetrated a Crime Against Person or Crime Against Property, the same numbers must be used.

37 - Age (of Offender), 4 characters (A) (Mandatory): The age of the offender must be entered either as an exact number of years, an estimate of years, a range of years, or as unknown. 44 - Multiple Arrestee Segments Indicator, 1 character (A) (Mandatory for Multiple Arrestee Segments): Only agencies that submit NIBRS batch files will encounter this field. This data element must be used to ensure that an arrestee is counted (scored) only once when the arrestee’s apprehension causes the arresting agency to submit two (2) or more Arrestee Segments concerning separate Group “A” Incident Reports. That is, the arrestee was involved in more than one crime incident and his/her arrest data is duplicated in each Group “A” Incident Report. In

such a situation, C = Count Arrestee must be entered into one of the Arrestee Segments, and M = Multiple must be entered into all of the remaining Arrestee Segments. If the arrestee's apprehension does not cause the arresting agency to submit multiple Arrestee Segments, N = Not Applicable must be entered.

Crime Mapping Fields

54 - Incident Address, 30 characters (A) (Optional): For incidents, this is the address where the incident occurred. The address number and street should both be entered.

When an address is mapped, it will return all possible results for the given address. If more than one is received by MapPoint, the geocoder will choose the first address on the list. If the address submitted is an exact match, one result will be returned.

For example, 5401 S 19th St., Hometown, WA or 5401 South 19th St., Hometown, WA returns one match, and that is the address that will be used. The system recognizes that “South” and “S” are the same. If the “S” is omitted, it will return all matches for that address including 5401 N 19th St., Hometown, WA, if it exists and the geocoder will choose the first address.

Address suffixes such as Dr., Ave., and St. should be used with caution. If the suffix is incorrect, the address will not be properly geocoded. If the suffix is omitted, MapPoint will pick the first address on the list.

55 - Incident Address City, 15 characters (A) (Optional): For incidents, this is the city where the incident occurred.
