

Two-way communication. One simple solution.

Attenti's Two-Piece GPS Tracking System gives you real-time, two-way communication in a more efficient client monitoring system.

Two-Way Communication

Variable Alerts

Notifies offenders with voice, text or vibration alerts

Immediate Response

Allows offenders to respond directly from the device, eliminating the need for a cell phone

Increased Efficiency

Increases overall monitoring efficiency through quicker response times and direct communication to offenders

Flexible Monitoring

Multiple Supervision Levels

Switches easily between active, hybrid or passive modes

Custom Program Configurations

Allows specific program rules to be set for each offender, including schedules and zone restrictions

Simple Activation

Sets up in less than 5 minutes

Reliable Hardware

Data Backup

Stores up to 30 days of tracking data if the cellular signal is lost
If the battery enters low-power mode, the device stores up to 3 days of data

Onboard Processing

Stores program rules on the device for faster notification delivery

Continuous Tracking

Stores offenders' data even if the cellular signal is disrupted

Tamper Resistance

Both the communication device and ankle bracelet are designed to prevent and reveal tampering

Home Curfew

RF Monitoring

The system base station doubles as a battery charger and home curfew RF monitoring unit

Cellular or Landline Signal

Reports on violations via landline if the cellular signal is lost indoors

Working on the Science of Safe and Sound

For more than 20 years, Attenti has been committed to helping agencies and companies improve the security of people worldwide. This mission continues with a growing line of products and services, all designed to protect lives, preserve property and manage budgets efficiently.
