

**attenti**

## **Sets the new standard for mobile breath alcohol monitoring.**

Easy-to-use, built tough, and fully integrated into Attenti's Electronic Monitoring Management Software. TRAC is a mobile breath alcohol monitoring system designed to get people's lives back on track.

**TRAC Mobile Breath**

Enabling communities to become safer and more secure.

Since 1994, Attenti has been trusted by government agencies and service providers worldwide by providing advanced technology, exceptional support, and industry expertise. Our field-proven solutions improve the security of communities by enhancing public safety, protecting agency budgets, and helping offenders rebuild their lives.

## Key Features

### Smartphone App

Compatible with Apple and Android devices. Communicates over all wireless networks and Wi-Fi.

### GPS location

GPS locations stored with every test provide more supervision data.

### Enhanced Identity Confirmation

Facial recognition and liveness detection to ensure the correct person is taking the test.

### Real-time violation and achievement notifications

Custom and pre-written alerts, reminders, and warnings sent via email or text to multiple parties aids in recovery.

### Validity Tests

Displays device serial number and special check digit on LCD screen.

### Flexible Testing with Automated Retesting

Choose from random, scheduled, or on-demand tests.
